*Allowable Subject Matter*

1. Claims 1-11, 13-18, and 23-28 are allowed.
2. The following is an examiner's statement of reasons for allowance:
  - a. The following is an examiner's statement of reasons for allowance: Claim 1 over comes the prior art. The prior art of record teaches of a method of testing a memory wherein one or more controllers operate in parallel to test at least some of the one or more memory blocks at the same time. One example of the prior art is Crouch, U.S. Patent Number, 5,995,731. The prior art of record, however, fails to teach the limitations determining a total memory capacity of the integrated circuit wherein the total memory capacity does not include the one or more bad memory cells and of binning out the total memory capacity of the integrated circuitry. This limitation overcome prior art found by the examiner. The subject matter sought to be patented as recited in the claims in this application has practical application in the field of computer systems
  - b. Claim 11 over comes the prior art. The prior art of record teaches of a method of testing a memory wherein one or more controllers operate in parallel to test at least some of the one or more memory blocks at the same time. One example of the prior art is Crouch, U.S. Patent Number, 5,995,731. The prior art of record, however, fails to teach the limitation wherein the reconfigurable memory has a total memory capacity that does not include the one or more bad memory cells and wherein the total memory capacity is binned out during testing of the reconfigurable memory. This limitation overcome prior art found by the examiner. The subject matter sought to be patented as recited in the claims in this application has practical application in the field of computer systems
